2018 Budget: Overview and Key Assumptions

Overview	Strong Economic Growth	Sustainable Fiscal Policy	Prudent Public Debt Management	EU Funds Absorption	
----------	------------------------	---------------------------	--------------------------------	---------------------	--

- The major budget priorities: health, education and infrastructure, to benefit from significant additional investment, but also from improving quality in health and education, including through incentive wages
- Investments and consumption were the main engines to reach the economic growth target of 4.5% in 2018
- In the 2018 Budget, the total amounts of payments by the European Union were RON 27.1 billion

The 2018 budget was built assuming a cash deficit of 2.97% of GDP (ESA deficit of 2.96% of GDP)

Macroeconomic Assumptions for the 2018 Budget	2018 September revision	2018 November revision
GDP (RON billion)	945.0	949.6
Real Growth Rate (%)	5.5	4.5
Average exchange rate RON / EUR	4.65	4.65
Inflation / annual average (%)	4.7	4.7
Average number of employees ('000s)	5,138	5,138
No. of unemployed persons registered as at the end of year ('000s)	347	310
- Rate of registered unemployment (%)	3.8	3.5
Gross average salary (RON / month)	4,300	4,385
Goods exports – 8.2 growth rate (%)	8.7	9.0
Goods imports – 10.6 growth rate (%)	9.4	9.7

By the second amendment of the budget, the revenues of the general consolidated budget increased by RON 229 million and the expenditures by RON 366 million, resulting in a growth of the cash deficit in the absolute value of RON 137 million, while maintaining the share in GDP at 2.97% as in the original planning and the first amendment of the budget (the GDP share of the deficit remained at the same level as the initial budgetary planning due to the increase of the projected nominal GDP for 2018 compared to the initial budget).

Objectives of the Debt Management Strategy

- Cover funding needs of the central government, while minimizing medium and long term debt costs
- Limit risks for the government public debt portfolio
- Develop the domestic market for government securities

Strategic Guidelines During 2018–2020

- Pursue policy of favoring local currency net financing to develop the domestic debt market and mitigate foreign currency exposure
- Smoothening redemption profile
- Foreign currency buffer to mitigate refinancing and liquidity risks
- Keep presence on the euro market, mainly in EUR and access to US dollar market or other foreign currency markets on an opportunistic basis
- External financing will be contracted mainly in EUR
- The issuance of domestic government securities in EUR can be considered only under the circumstances of reimbursement/refinancing of similar instruments
- Monitor exposure to interest rate risk by maintaining under control the share of domestic debt refixing within the next year and ATR for the total portfolio
- Continue the use of financing instruments offered by international financial institutions to benefit from favorable terms and conditions

To assure the highest level of absorption, Romania implemented structural measures:

- Strengthening and improving of the monitoring at the level of large infrastructure projects in order to speed up implementation

- Active promotion by the Government of the alternative use of EU funds, through similar projects

- Further reallocation among priority goals of various programmes

- Increase the administrative capacity of programming departments through the use of European Investment Bank expertise

- Extending the categories of eligible expenditures, allowing the reimbursement for expenditure already realised under the approved projects

- Phasing of projects between the 2007–2013 and the 2014–2020 programming periods

Note: The final absorption rate can be calculated after the acceptance by the EC of the final documents for closure, that were submitted by the Member States up to March 31, 2017.

Cohesion funds are aimed at reducing disparities between the various regions and the lags of the least-favoured regions;

Aside from cohesion funds, during the 2014–2020 period, Romania has additional available financings of approx. EUR 20bn, under the Common Agricultural Policy;

At the end of June 2019, the total amounts received from the European Commission, pre-financing and reimbursements related to the operational programs financed by the FESI and FEAD (POAD), are at approx. EUR 9,4 billion, which means approx. 30% of the EU allocation for these programs (about EUR 31 billion).

Increased Focus on Controls

- Performance Oriented: There is a monitoring framework, including milestones and specific targets corresponding to each operational programme
 - Their completion will be verified for 2018 and 2023
- Improving efficiency of EU funds spending: the EC is putting in place performance reserves in amounts ranging between 5 and 7 percent of (most of) the allocations under each priority within the operational programmes
 - The performance reserve amounts will be released subject to the achievement of the milestones set for 2018
- Ex-ante conditionalities to ensure the conditions for effective cohesion policy investments and predictability of national sectorial policies

The impact of EU Funds on the Romanian economy is set to increase given Romania's strides in improving EU fund absorption and the increased focus on European Commission Control

Note: The 2014–2020 allocations for Technical Assistance, Large Infrastructure and Regional Operational OP's was modified due to the financial reallocations between the programmes.

* The OP for SME's Initiative was included in the OP Regional by EC approval from 16.10.2018.
