# National medium-term fiscal-structural plan (1/3) Overview GDP Growth Fiscal Policy Public Debt Management EU Funding Fiscal consolidation is expected to be achieved over a seven-year timeframe

- The budget deficit adjustment trajectory begins with an estimated budget deficit of 7.9% (ESA) in 2024, aiming to reach 2.5% of GDP by 2031.
- Fiscal consolidation relies primarily on reducing spending, projected to decrease by nearly 5 percentage points of GDP. Revenue is expected to increase by 2 percentage points of GDP, driven by tax measures and improved collection efforts.
- The trajectory also reflects an average annual adjustment in the primary structural deficit of around 1 percentage point of GDP over the 7-year extended period.
